*"Art is a visual language that can capture emotions as well as physical details. Art is also a spiritual adventure. It can be flexible enough to be interpreted by the viewer and past experiences in their own life, as well as the artist's actual motivation. Before I start to create, I sit in the energy or the environment with the person, location, or event that I am capturing. The energy of Nature as well as the details in nature inspires me. Depending on my mood and the medium, I create, connect, and energetically flow with my perception of what is in front of me. Whether it is the peacefulness of nature, a person relaxing with nature, or the miraculous way nature creates details of texture and color, I capture a moment of connectedness, of being."*
